- (a) As reported effective tax rate is calculated as: "As reported income tax provision" divided by "As reported income before income taxes."
- (b) Management believes that the effective tax rate adjusted for impairments and other charges, and their related tax effect, for the three months ended June 30, 2022 is useful to investors, especially when comparing this rate with previous and subsequent periods, primarily because management views the excluded items to be outside of the company's normal operating results. Management analyzes effective tax rate without the impact of these items as an indicator of normal tax results. Adjusted effective tax rate is calculated as: "Adjusted income tax provision" divided by "Adjusted income before income taxes."
