- (a) As reported effective tax rate is calculated as: "As reported income tax provision" divided by "As reported income from continuing operations before income taxes."
- (b) Management believes that the effective tax rate adjusted for impairments and other charges for the three months ended March 31, 2018 is useful to investors, especially when comparing this rate with previous and subsequent periods, primarily because management views the excluded items to be outside of the company's normal operating results. Management analyzes effective tax rate without the impact of these items as an indicator of normal tax results. Adjusted effective tax rate is calculated as: "Adjusted provision for income taxes" divided by "Adjusted income from continuing operations before income taxes."
