Halliburton Names Murry S. Gerber to Board of Directors

January 10, 2012

HOUSTON--(BUSINESS WIRE)--Jan. 10, 2012-- Halliburton (NYSE: HAL) announced today that Murry S. Gerber has been named to the company's board of directors. The appointment is effective January 10, 2012 and Gerber will be confirmed by the stockholders at the annual meeting in May 2012.

Gerber became CEO of EQT Corporation in 1998 and was elected chairman in 2000. He served as chairman, CEO and president until 2007, at which time he became chairman and CEO. He retired as CEO of EQT Corporation in April 2010 and remained as Executive Chairman until May 2011. He recently resigned from the EQT board of directors.

During Gerber's tenure, EQT transformed itself from a regional gas distribution company to one of the largest and fastest growing independent exploration and production companies in the United States, the largest natural gas company in the Appalachian basin, and inclusion on the S&P 500 Index.

Before joining EQT, Gerber served as CEO of Coral Energy, a subsidiary of Shell (NYSE: RDS-A). Coral, now Shell Energy North America, is one of North America's largest energy marketers. He had previously been treasurer of Shell Oil Company and had served in a number of management and technical positions over a 19-year career at Shell.

Gerber earned a bachelor's degree in geology from Augustana College and a master's degree in geology from the University of Illinois.

"Murry brings a lifetime of energy industry success to the Halliburton board," said David J. Lesar, Halliburton chairman, president and CEO. "His leadership, his experience in the Marcellus shale and unconventionals, as well as his intimate knowledge of international oil companies will be valuable in the coming years. We are glad he has chosen to add his talents to our diverse and multifaceted board."

Gerber joins current Halliburton board members Alan M. Bennett, James R. Boyd, Milton Carroll, Nance Dicciani, S. Malcolm Gillis, Abdallah S. Jum'ah, David J. Lesar, Robert A. Malone, J. Landis Martin and Debra L. Reed.

ABOUT HALLIBURTON

Founded in 1919, Halliburton is one of the world's largest providers of products and services to the energy industry. With nearly 70,000 employees in approximately 80 countries, the company serves the upstream oil and gas industry throughout the lifecycle of the reservoir – from locating hydrocarbons and managing geological data, to drilling and formation evaluation, well construction and completion, and optimizing production through the life of the field.
