Halliburton Names New Chief Financial Officer

June 12, 2017

HOUSTON--(BUSINESS WIRE)--Jun. 12, 2017-- Halliburton Company (NYSE: HAL) is pleased to announce the appointment of Christopher (Chris) Weber as executive vice president and chief financial officer (CFO) effective June 22, 2017. Weber joins Halliburton from Parker Drilling Company, a global provider of drilling services and rental tools, where he served for four years as senior vice president and CFO.

Weber has more than 20 years of experience in the energy industry; holding key roles in finance, strategic planning, corporate development and operations. Previously, Weber served as the vice president and treasurer of Enscopl, one of the world's largest offshore drilling companies, where he led the company's global Treasury and Risk Management functions. He joined Enscopl following the acquisition of Pride International, where he spent five years in various management positions with increasing responsibility. Prior to Pride, Weber worked with The Boston Consulting Group advising oil and gas and electric utility companies on strategic, financial and operational issues, in both Houston and London.

Weber holds an MBA in finance and strategic management from The Wharton School at the University of Pennsylvania and an undergraduate degree in economics and English literature from Vanderbilt University, where he graduated magna cum laude.

"We are excited to have Chris join Halliburton. He complements our strong returns-focused culture, and we believe his impressive reputation for execution and achieving results makes him the right choice to lead our financial strategy," said Jeff Miller, president and CEO of Halliburton. "His skillset fits well with the strength of our existing Finance organization and his broad range of capabilities will complement our experienced management team as we continue to deliver industry leading returns to our shareholders."

"I want to thank Halliburton General Counsel Robb Voyles for leading both our law department and finance team as interim CFO over the past four months," added Miller. "Taking on these dual roles was no easy task. His relentless efforts and dedication provided a seamless transition for which we are grateful."

About Halliburton

Founded in 1919, Halliburton is one of the world's largest providers of products and services to the energy industry. With approximately 50,000 employees representing 140 nationalities, and operations in approximately 70 countries, the company serves the upstream oil and gas industry throughout the lifecycle of the reservoir – from locating hydrocarbons and managing geological data, to drilling and formation evaluation, well construction, completion and production optimization.
