SPECIALIZED DISCLOSURE REPORT

HALLIBURTON COMPANY

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

001-03492

(Commission File Number)

No. 75-2677995

(IRS Employer
Identification No.)

3000 North Sam Houston Parkway East
Houston, Texas

(Address of principal executive offices)

77032

(Zip Code)

Lance Loeffler

Executive Vice President and Chief Financial Officer

(281) 871-7606

(Name and telephone number, including area code, of the person to contact in connection with this report)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period January 1, 2018 to December 31, 2018.

SECTION 1 - CONFLICT MINERALS DISCLOSURE

Item 1.01 Conflict Minerals Disclosure and Report

Halliburton Company (the “Company” or “Halliburton”) conducted a reasonable country of origin inquiry (RCOI) of its suppliers to determine whether any conflict minerals, as defined by paragraph (d)(3) of Item 1.01 of Form SD, necessary to the functionality or production of a product manufactured or contracted to be manufactured by the Company during 2018 (the “Products”) originated in the Democratic Republic of the Congo or an adjoining country, as defined by paragraph (d)(1) of Item 1.01 of Form SD. Halliburton exercised due diligence on the source and chain of custody of its conflict minerals, as discussed in paragraph (c)(1) of Item 1.01 of Form SD, that conforms to the Organisation for Economic Co-operation and Development (OECD) Due Diligence Framework for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas.

Conflict Minerals Disclosure

In accordance with paragraph (c) of Item 1.01 of Form SD, Halliburton filed a Conflict Minerals Report (CMR) for the reporting period January 1, 2018 to December 31, 2018, as Exhibit 1.01 to this Form SD, and has made such report publicly available on Halliburton's website, at: <http://ir.halliburton.com/phoenix.zhtml?c=67605&p=irol-sec>. Information on Halliburton's website shall not constitute a part of this Form SD.

Item 1.02 Exhibit

The Company has contemporaneously filed the CMR with this Form SD, which is attached as Exhibit 1.01.

SECTION 2 - EXHIBITS

Item 2.01 Exhibits

Exhibit 1.01 - Conflict Minerals Report for the reporting period January 1, 2018 to December 31, 2018.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Date: May 30, 2019

HALLIBURTON COMPANY

By: /s/ Lance Loeffler

Lance Loeffler

Executive Vice President and Chief Financial Officer

Conflict Minerals Report

Section I - Introduction of Applicability

Pursuant to Rule 13p-1 under the Securities Exchange Act of 1934, this report was prepared for the reporting period January 1, 2018 to December 31, 2018 (the “Reporting Period”).

Halliburton Company (the “Company,” “Halliburton,” “we,” or “our”) is a leading provider of services and products to the upstream oil and natural gas industry. Halliburton has manufacturing operations in various locations, the most significant of which are located in the United States, Canada, Malaysia, Singapore, and the United Kingdom.

Halliburton comprises 14 product service lines (PSLs). The PSLs operate in two divisions: the Completion and Production division and the Drilling and Evaluation division. Our Consulting & Project Management PSL works across both divisions and is the spearhead of our integrated-services strategy. Its financial results are included in the Drilling and Evaluation division. PSLs are primarily responsible and accountable for strategy, technology development, process development, people development and capital allocation.

Completion and Production Division

- Artificial Lift
- Cementing
- Completion Tools
- Multi-Chem
- Pipeline & Process Services
- Production Enhancement
- Production Solutions

Drilling and Evaluation Division

- Baroid
- Drill Bits & Services
- Landmark
- Sperry Drilling
- Testing & Subsea
- Wireline & Perforating

Supporting Both Divisions

- Consulting & Project Management

During the Reporting Period, products manufactured, or contracted to be manufactured, contained one or more of the following minerals: tantalum, tin, tungsten, or gold (3TG). Listed below are examples of where 3TG may be present in Halliburton products:

Metal	Industry Applications	Applications in Halliburton
Tantalum Refined from Columbite-Tantalite (Coltan)	Capacitors, Resistors	Tantalum Capacitors, Alloys
Tin Refined from Cassiterite	Chemical Solutions, Capacitors Electrodes, Tin Alloys, Dioxide, Electroplating	Integrated Circuits, Pins, Resistors, Capacitors, PCBs, and Soldering
Tungsten Refined from Wolframite	Tungsten Carbide, Alloy, Light Bulb, Heating Elements, and Tungsten Inert Gas Welding	Electrodes, Tungsten Carbide (Drill Bits), Welding
Gold	Electrical Wiring, Connectors, Contact, and Gold Plating	Contacts, Pins, Connectors, Cable Harness, Wire Harness, Gold Plating

Section II - Reasonable Country of Origin Inquiry (RCOI)

Halliburton conducted an RCOI among our suppliers on the source and chain of custody of certain minerals necessary to the functionality or production of a product manufactured or contracted to be manufactured by the Company (the Products) during the Reporting Period to determine whether they originated from the Democratic Republic of the Congo (DRC) or an adjoining country.

The RCOI for the Reporting Period was designed in accordance with the Organisation for Economic Co-operation and Development (OECD) Due Diligence Framework for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (the OECD Framework). Our suppliers were asked to complete the Conflict Minerals Reporting Template (CMRT), a survey tool developed by the Responsible Minerals Initiative (RMI), formerly known as the Conflict-Free Sourcing Initiative (CFSI). The CMRT is commonly utilized to identify smelters or refiners (SORs). Suppliers were provided the option of submitting the required information through an online survey version of the template directly on our third-party service provider's platform or through email with the MS Excel version attached for upload to the platform.

Section III - Design of Conflict Minerals Program and Due Diligence Measures

We are a downstream purchaser of products that include conflict minerals. We designed our program in accordance with the 5-Step OECD Framework as follows:

OECD Step 1: Establish strong company management systems

- Maintained the Supplier Ethics Statement on our external website at <http://www.halliburton.com/en-US/about-us/supplier-relations/Policies-and-Procedures.page?node-id=hp11nobm>, which reflect our commitment and expectation of supplier commitment to ethical business behavior, conflict-free sourcing, and human rights. Suppliers were notified via our RCOI email;
 - Maintained our Human Rights Statement on our external website at <http://www.halliburton.com/en-US/about-us/corporate-governance/halliburton-human-rights.page?node-id=hgeyxt6w&SRC=Footer>, which reflects our long-standing commitment to uphold human rights as defined by the United Nations Universal Declaration of Human Rights (UDHR);
 - Continued to include clauses requiring conflict-free materials and products from suppliers in our Master Purchase Agreement (MPA) and standard Purchase Order Terms & Conditions templates. Additionally, suppliers and their business partners are now also contractually bound to protect and uphold the fundamental human rights of their employees as stated in the UDHR;
 - Continued using our internal Conflict-Free Sourcing Policy, updated in 2017, which aligns our conflict minerals program description with the 5-step OECD Framework and makes our employees aware of their responsibilities under the act to use suppliers who do not source 3TG from uncertified SORs;
 - Utilized a cross-functional internal team among the Procurement, Material Management, Finance, Information Technology, and Law departments led by our Procurement, Materials & Logistics (PM&L) Business Compliance & Optimization Group;
 - Retained a third-party service provider to query our applicable suppliers using the CMRT;
 - Continued using a system of controls and transparency by developing a due diligence process using the CMRT, including evaluating and scoring the risk presented by each smelter, refiner, and respondent (supplier providing a CMRT) based on the SORs indicated and due diligence program described;
 - Continued utilizing a platform to upload 2018 supplier information. The platform tracked supplier responses on a real-time basis and allowed us to leverage better data reporting and to take action for non-responsive suppliers;
 - Saved and archived relevant records in an electronic database on a SharePoint site relevant to each year's campaign;
 - Granted all suppliers determined to be in-scope for conflict mineral regulatory purposes a free membership with access to training and information on conflict minerals provided by our third-party service provider;
 - Educated suppliers upon request on Dodd-Frank Action Section 1502, how the Conflict Mineral Rule applies to them and why it is important to respond to our RCOI. Also, provided resources in addition to those from our third-party service provider; and
 - Continued to make our Ethics Helpline available for suppliers to report any violations of the law or violations of our Code of Business Conduct. The RMI also established a grievance mechanism which its members, stakeholders, and the public can utilize to raise concerns about the initiative, the audit program, protocols, SOR operations that fall in-scope of the Responsible Minerals Assurance Process (RMAP), formerly the Conflict-Free Smelter Program (CFSP), audit quality and auditor competencies, minerals supply chains and upstream/downstream initiatives.
-

OECD Step 2: Identify and assess risks in the supply chain

- Identified in-scope suppliers, which are tier one suppliers that supply products to Halliburton that may contain 3TG. Selection was based on the following criteria:
 - Products supplied to Halliburton plants within the Reporting Period;
 - Harmonized Tariff Codes and Material Groups of supplied products that may contain metal;
 - Product sales from Halliburton procurement plants to third party customers; and
 - Halliburton newly acquired manufacturers with reporting obligations pursuant to Rule 13p-1 under the Securities Exchange Act of 1934;
- Performed audit on supplier data to confirm accuracy of vendor contact information prior to campaign launch;
- Conducted a survey using the CMRT and our third-party service provider's platform, which included a phone number and email address to facilitate correspondence between suppliers and internal stakeholders;
- Requested suppliers provide an electronic signature before submitting their data to Halliburton to verify that all answers submitted were accurate to the best of the supplier's knowledge;
- Provided a product list for distributors to work with second-tier suppliers and asked distributors for a product-level CMRT, including directly interacting with second-tier suppliers requesting their responses;
- Established deadlines for suppliers' CMRT submissions, including requiring our tier one suppliers to provide an updated CMRT if additional information became available;
- Extended CMRT submission deadline by five days compared to the previous year in order to give suppliers additional time and increase the response rate;
- Followed up with non-responsive suppliers requesting their responses, through phone calls and emails, including up to four email reminders and two phone call reminders from our third-party service provider;
- Conducted direct outreach through Halliburton PM&L to non-responsive tier one suppliers requesting their participation in the program;
- Utilized our third-party service provider to evaluate supplier CMRT responses for plausibility, consistency, and gaps;
- Analyzed and compared the SORs identified by the supply chain with the following internationally accepted audit standards to determine which SORs are considered "DRC Conflict-Free": the RMAP, the London Bullion Market Association (LBMA) and the Responsible Jewellery Council (RJC); and
- Retained status as a member of the RMI (Halliburton member code HALL), through which we:
 - support engagement by the RMI with SOR(s) and the obtainment of information on country of origin and transit and transportation routes used between mine and SORs;
 - support the RMI RMAP, which includes an assessment of whether SORs have carried out all five steps of due diligence for responsible supply chains of 3TG from the DRC and adjoining countries; and
 - support spot checks and/or audits at SOR facilities.

OECD Step 3: Design and implement strategy to respond to identified risks

- Maintained our risk management plan by reviewing the due diligence of suppliers and SORs;
 - Removed over one hundred suppliers from our supply chain for not complying with our conflict mineral requirements;
 - Performed risk mitigation efforts by following up with tier one suppliers for validation and additional information on their smelter data and encouraged all smelters without RMAP "Compliant" status to participate in an independent third-party audit program;
-

- Sent “thank you” emails to smelters with RMAP “Compliant” status for being certified as conflict-free;
- Responded to supplier and customer inquiries in a timely manner by both Halliburton and our third-party service provider;
- Provided findings and progress reports periodically to senior management;
- Attended webinars and reviewed online resources to learn and understand new developments and best practices;
- Initiated risk mitigation activities when high-risk facilities were reported on a CMRT by one of the suppliers surveyed. High-risk facilities are those identified by our third-party service provider to source from the DRC or adjoining countries. Through our third-party service provider, submissions that include any of the high risk facilities immediately produce a receipt instructing the supplier to take their own risk mitigation actions, including submission of a product specific CMRT to better identify the connection to products that they supply to Halliburton, and escalating up to removal of these high risk smelters from their supply chain; and
- Contacted tier one suppliers using a high risk, non-compliant smelter and requested the supplier confirm if the non-compliant smelter was used in the goods supplied to Halliburton. If a supplier confirms or cannot identify that the smelter was used in goods supplied to Halliburton, then we will instruct the supplier to remove the smelter from goods supplied to Halliburton or take steps to help the smelter become compliant.

OECD Step 4: Carry out independent third-party audit of supply chain due diligence

- Retained status as a member of the RMI, by which we:
 - exercise leverage over upstream suppliers indirectly by requiring SORs to undergo an independent third-party audit, which requires due diligence, traceability, chain of custody, risk assessment, and mitigation activities upstream;
 - support the RMI’s efforts to monitor whether SOR(s) demonstrate significant and measurable improvement within a reasonable time frame from the adoption of their risk management plans; and
 - support the RMI’s independent third party audits of the SOR’s due diligence practices through the RMAP; and
- Reviewed meeting notes from the RMI Smelter Engagement Team (SET) and Due Diligence Team.

OECD Step 5: Report on supply chain due diligence

- Report annually on supply chain due diligence by filing with the SEC a Form SD and Conflict Minerals Report (CMR); and
 - Upload CMR to our company website at <http://ir.halliburton.com/phoenix.zhtml?c=67605&p=irol-sec>, on an annual basis.
-

Section IV - Results of Due Diligence Measures

A total of 1,294 suppliers were identified as in-scope for conflict mineral regulatory purposes and contacted as part of the RCOI process conducted by our third-party service provider. The response rate among these suppliers was 78% (1,006). Of these responding suppliers, 66% (666) confirmed their supply to Halliburton did not contain 3TG. The remaining 34% (340) of suppliers used 318 different SORs, of which, 53 indicated DRC sourcing. Out of the 53 SORs, one was found to be non-compliant. The non-compliant smelter was considered compliant until April 8, 2019, when it failed to complete the annual audit. We reached out to the non-compliant smelter via email urging them to become conflict-free certified. Additionally, we are also working with our suppliers who listed the non-compliant smelter in their CMRT to determine if the smelter was used in our products since CMRTs were not returned at the product-level. Action plans will be implemented to remove the smelter, if applicable. Any supplier who does not comply with our expectations is subject to termination.

A total of 288 suppliers (22%) did not respond to our request to complete a CMRT as required by our MPA, standard terms and conditions, and Supplier Ethics Statement. To further our commitment, Halliburton increased the spend threshold by 25% for action on non-responsive suppliers. As a result, roughly 40% of the non-responsive suppliers were removed from our supply chain. We instructed the remaining non-respondent suppliers to develop corrective action plans to meet supplier requirements or risk being removed from our supply chain.

Halliburton received some incomplete responses from those surveyed. Some suppliers were unable to determine if they had provided conflict minerals originating from the DRC or an adjoining country, and other suppliers did not respond. Since all CMRTs were not submitted at a product-level, we do not have sufficient information to determine all SORs in our supply chain. The country of origin information was provided by our third-party service provider, based on information provided from the SORs as part of the RMAP and other interactions the third-party service provider may have had with the SORs.

Based on the information provided by our suppliers and our own due diligence efforts through May 2019 with 318 verified SORs (see Annex I), the below was identified:

- 253 SORs (80%) have received compliant status; meaning they have been audited and found to be compliant with the relevant RMAP protocol;
 - 3 out of 253 SORs were identified to source 3TG from the DRC or adjoining countries, all of which were found to be conflict-free certified;
- 58 SORs (18%) have not received compliant or active status, and the RMI status for these will be noted as “Other” in Annex I;
 - 33 out of 58 SORs were identified not to source 3TG from the DRC or adjoining countries;
 - 1 out of 58 SORs was identified to source 3TG from the DRC or adjoining countries; and
 - *Note: As previously mentioned, this smelter was moved from the compliant list to the non-compliant list in April 2019.*
 - 24 out of 58 SORs had unidentifiable 3TG countries of origin; and
- 7 SORs (2%) have received active status, meaning engaged in the program but not yet certified compliant.

For the 318 SORs mentioned above, our third-party service provider was able to provide countries of origin for most SORs. The countries of origin for the Products purchased by the identified SORs are listed in Annex II.

Section V - Risk Mitigation for Future Due Diligence

Halliburton will continually work toward a conflict-free supply chain with ethical sourcing of materials and products. There are many stakeholders that are dependent directly or indirectly on legal mining operations in the DRC or an adjoining country, which are not benefiting armed groups in that region. Halliburton promotes verifiable conflict-free sourcing from the DRC or an adjoining country.

Halliburton will take the following measures to enhance its due diligence on the source and chain of custody of conflict minerals by:

- Encouraging non-respondent suppliers to develop corrective action plans to promote compliance with our supplier requirements;
 - Developing corrective action plans for suppliers using an active SOR that sources from the DRC or adjoining countries and has not received compliant or active status from RMI;
 - Encouraging suppliers to evaluate the business relationship with SORs refusing to proceed with an independent third-party audit program;
 - Providing assistance and education regarding the Dodd-Frank Act Section 1502 to suppliers to escalate down compliance requirements to more tiers of our supply chain;
 - Encouraging eligible SORs' identification from the suppliers; and
 - Contacting SORs without a RMAP "Compliant" status in our supply chain to participate in an independent third-party audit program.
-

Section VI - Inherent Limitations on Due Diligence Measures

As a downstream purchaser and user of conflict minerals, Halliburton's due diligence measures can provide only reasonable, not absolute, assurance regarding the source and chain of custody of the necessary conflict minerals. Our due diligence processes are based on the necessity of seeking data from our tier one suppliers and those suppliers seeking similar information within their supply chains to identify the original sources of the necessary conflict minerals. Such sources of information may yield inaccurate or incomplete information and may be subject to fraud. Many of our suppliers were nonresponsive and many were uncertain or provided data at a company or division level, as further described below. Halliburton has undertaken measures to verify responses and minimize these limitations, but cannot guarantee the accuracy of the responses provided.

Halliburton's supply chains are diverse between product service lines. Our products are many tiers removed from the SORs. To determine whether any 3TG was sourced from the DRC or an adjoining country, we relied on our tier one suppliers responding with accurate SOR identification information. Many suppliers provided responses with SOR information based on a company or divisional level, rather than a product-level specific to the materials and components we use. As such, the aggregated information set forth in Annex I and Annex II does not necessarily relate to materials or components used in Halliburton's products.

ANNEX I - Smelters or Refiners (SORs)

The information in this Annex is an aggregation of data provided by Halliburton's suppliers and not a confirmation of conflict minerals contained in our products.

Reported by the RMI RMAP on April 2019

Compliant - audited and found compliant with the relevant RMAP protocol

Active - engaged in the program but not yet compliant

Other - have not received compliant or active status

ANNEX II - Countries of Origin

The information in this Annex is an aggregation of data provided by Halliburton's suppliers and not a confirmation of conflict minerals contained in our products.

Countries of origin include:

Angola	Guyana	Papua New Guinea
Argentina	Hong Kong	Peru
Armenia	Hungary	Philippines
Australia	India	Poland
Austria	Indonesia	Portugal
Belarus	Ireland	Russian Federation
Belgium	Israel	Rwanda
Bermuda	Italy	Saudi Arabia
Bolivia	Ivory Coast	Sierra Leone
Brazil	Japan	Singapore
Burundi	Jersey	Slovakia
Cambodia	Kazakhstan	South Africa
Canada	Kenya	South Sudan
Central African Republic	Korea	Spain
Chile	Kyrgyzstan	Suriname
China	Laos	Sweden
Colombia	Luxembourg	Switzerland
Congo (Brazzaville)	Madagascar	Taiwan
Czech Republic	Malaysia	Tajikistan
Djibouti	Mali	Tanzania
DRC	Mexico	Thailand
Ecuador	Mongolia	Turkey
Egypt	Morocco	Uganda
Estonia	Mozambique	United Arab Emirates
Ethiopia	Myanmar	United Kingdom
Finland	Namibia	United States of America
France	Netherlands	Uzbekistan
Germany	New Zealand	Vietnam
Ghana	Niger	Zambia
Guinea	Nigeria	Zimbabwe
